Jalen Scrivner

jalenzscrivner@gmail.com

SUMMARY

Recently graduated software developer with many projects completed through his education. Experience in a wide variety of languages and systems, with a focus on web and mobile development. Self-motivated, hard working and can work well in a collaborative environment, in both leader and follower positions.

WORK EXPERIENCE

Raley's Supermarkets | **Sacramento, California**

At Raley's, I proved to my peers and managers that I am a dependable and diligent worker, elevating to a variety of positions due to my hard work and the trust of my managers.

Sept 2023 - Feb 2024

Produce Clerk
- Requires high attention to detail when setting up displays or culling items.
- Learned to take ownership and accountability as the primary closer.
- Worked independently to ensure the department was presentable by closing time, employing my time management skills effectively to do so.

June 2022 - Sept 2023

eCart Clerk
- Worked closely with customers to efficiently deliver their orders.
- Learned to take initiative in the department when no leads were present.
- Offered ideas and solutions to improve the departments' workflow.

Nov 2020 - June 2022

Courtesy Clerk
- Gained experience working in a team setting.
- Learned to communicate with customers effectively.
- Employee of the Month in November 2021.

PROJECTS

ChordHelp - Chord Viewer (https://jalenzscrivner.com/ChordHelp/)

May 2024
- Created a React app to help me quickly find chords for various instruments.
- Works on both mobile and desktop and displays the selected chords for ukulele, banjo and guitar.

CSUS AI Hackathon

Apr 2024
- Participated in a week long AI-themed Hackathon hosted by Sacramento State
- Developed a web application that leverages Python web scraping and OpenAI's Assistants API to match a users resume to the scholarships that they are the most qualified for.

Hackswift 2024

Mar 2024
- Participated in a 72-hour collaborative programming project with a team of 5 people, communicating effectively and working as a team throughout.
- Developed a web application in React that allows users to find and create

recipes, reduce food waste and read food storage tips.

EDUCATION
